All Proceeds will benefit AIDS Research Alliance

AIDS Research Alliance was founded in 1989 by a committed group of physicians and philanthropists who understood that the AIDS crisis could only be stopped through medical research.

Over the past 18 years, ARA has conducted over 70 clinical and pre-clinical studies, ranging from complimentary therapies that take a holistic approach to HIV management, to HIV eradication and first-in-human HIV vaccine research. Our approach to HIV/AIDS medical research combines scientific rigor with activist urgency, and collaborations with other scientific organizations, in order to stop the AIDS pandemic. We exist to develop more effective treatments for people living with HIV/AIDS; find medical strategies to prevent the further spread of the virus; and pursue our ultimate goal – a cure for AIDS.
